

Temperature Converter

OS-Ex-TC-CC

THERMOCOUPLE TO CURRENT CONVERTER

The OS-Ex TC-CC is a BAREAU VERITAS (ATEX) approved interface unit, to accept an input mV signal and offers a proportional galvanically isolated 4-20mA current signal.

Customer's field requirements on actual thermocouple type to be specified while ordering.

FEATURES :

Manufactured according to European standard EN 60079-0:12 and EN 60079-11:12. Input signal/output signal and the power supply are galvanically isolated from each other **-1500V, 50Hz**.

OPERATION :

A 24V DC power supply (located in the non hazardous area) is connected to terminal 9(+) & 12(-). of the current converter OS-Ex-TC-CC shall power the mV Thermocouple connected to terminals 2(-) & 3(+) or 1(-) & 3(+).

Precision & low loss toroidal transformer are used between hazardous & non-hazardous area circuit ensuring a minimum loss in energy. Supply is galvanically isolated between hazardous and non-hazardous area circuit. As the system is truly floating there is no need to connect any intrinsic safe earth. Both the field mounted device (Voltage source) and also the controller in the non-hazardous area could be separately earthed if required without any adverse results on the accuracy of measurement.

Insert Jumper for down scaling and remove the Jumper for up scaling.

APPLICATIONS :

To enable a remote temperature measurement as a thermocouple to 4-20mA current converter.
